Not only one of the largest ranges of specialised equipment, but also the most qualified professionals in pumping and power generation in Australia.

ABOUT US

National Pump & Energy (NPE) provide pump, power and compressor hire equipment throughout Australia to the construction, mining, oil & gas, municipal, agricultural and industrial industries.

As a total solution provider, NPE also have fully qualified and experienced crews for onsite project installation and maintenance of all pumping and power generation requirements.

National Pump & Energy have a proven track record in delivering quality equipment solutions that focus on quality, reliability, safety and performance. We pride ourselves on delivering complete expert rental solutions, not just a piece of equipment.

The extensive range of ready for rent equipment is second to none in terms of suitability and reliability. This means a hassle free and cost effective solution for you. The fleet is built on strong partnerships with some of the worlds best brands, giving you the ability to always get the best equipment for your job.

HISTORY

Having been in operation for over 15 years, National Pump & Energy have a proven history of providing outstanding results in complex and demanding environments.

From humble beginnings, NPE has grown and evolved to become a leading Australian supplier with branches in Mackay, Brisbane, Newcastle, Perth, Kalgoorlie, Darwin and Weipa which service all parts of Australia.

BASICALLY WHEN IT COMES TO PUMPING, POWER GENERATION AND COMPRESSED AIR EQUIPMENT, NATIONAL PUMP & ENERGY ARE YOUR TOTAL SOLUTIONS PARTNER.

HEALTH, SAFETY & ENVIRONMENT

NPE's safety system is accredited to AS/NZS 4801, and ensures that we operate under formal documented policies and procedures that are compliant with worldwide best practises.

Our employees are committed to achieving the highest possible performance in Occupational Health and Safety in the workplace and we have a reward and recognition program for those individuals who continually exceed in this area.

NPE has a dedicated safety team to ensure that we meet the formal requirements of AS/NZS 4801, which include:

- ✓ Adhering to client and legislative requirements
- ✓ Conducting internal audits and inspections
- ✓ Hazard identification and management
- ✓ Formal investigation of all incidents
- ✓ Formal induction and assessment of staff and contractors
- ✓ Formal reporting to the board of directors

» SERVICES

National Pump & Energy is a turn-key pumping, power generation and compressed air equipment solutions provider. Our dedicated and experienced team can assist you with all aspects of your project from site inspection through system design, project costing, equipment selection, in house construction – assembly, testing, installation, commissioning, maintenance, operation and/or complete project management, where required.

National Pump & Energy have the experience, capacity and most importantly, commitment, to assist you with your project anywhere in Australia.

SERVICE DELIVERY

- ✓ Short term equipment hire
- ✓ Long term equipment hire
- ✓ Equipment sales
- ✓ Site assessment
- ✓ Fit for purpose system design
- ✓ Project management
- ✓ Installation, commissioning & operation
- ✓ Ongoing assessment of project requirements

SUPPORT

- ✓ Comprehensive pre-hire inspection and maintenance
- ✓ 24/7 responsive field service
- ✓ Spare parts availability
- ✓ Fully equipped specialist workshops
- ✓ Qualified & experienced tradesmen.

LOGISTICS

- ✓ Australia-wide branch network
- ✓ In-house and sub-contracted logistics networks

SERVICE MANAGEMENT

National Pump & Energy has an industry leading team of skilled pump and power professionals to custom design a solution for your requirements.

The detailed on-site (or remote if required) inspection and assessment will ensure that the designed solution will produce the most effective and reliable outcome whilst reducing potential delays and bottom line impacts.

TAILORED EQUIPMENT SOLUTIONS

The key difference between NPE and other hire companies is that we offer tailored solutions and service, not just equipment. Our personal and detail oriented approach means that you can ensure that all project requirements will be met.

“NPE was the only company we could find with both the plant and technical aptitude to provide the well-engineered solution we were provided with”

Fitzroy River Water - Rockhampton Regional Council

» PUMPING EQUIPMENT

NPE is a specialist ready for rent pumping equipment and solutions provider.

From pump hire and sales to full dewatering design, installation and management, NPE can do it all.

NPE has an extensive pump fleet and partnerships with leading suppliers and manufacturers, so we can guarantee accessibility of specialised equipment for any application.

Silenced Canopy Pumps

- Extensive range of silenced pumps from 6" - 12"
- Low noise output makes them perfect for residential areas
- Used for wellpointing, general sumping and bypass pumping
- NPE are BBA Pumps exclusive Australian distributor
- Remote start/stop & monitoring telemetry operations available

High Head & High Flow Pumps

- Up to 1750L/S & 470m head.
- Skid, trailer or pontoon mounted configurations
- Mine spec available
- Stainless steel wet ends available
- Remote start/stop & monitoring telemetry operations available

Submersible Pumps

- Up to 500L/S & 180m head
- Single or 3 phase options
- 415v or 1000v variations

Slurry Pumps

- Up to 500L/S & 187m head.
- Electric, hydraulic & diesel
- Excavator mounted and agitator options

Booster Pumps

- Large Range of Variable Flows
- Large Range of Variable Pressures

Bore Pumps

- Large range of high flow and high head bore pumps,
- Complete package solutions, from installation to flow management to flow monitoring and pipeline to discharge points,
- Silent power packages also available
- Remote start stop operations available, i.e. to maintain water levels in tanks, dams etc.

Trailer Mounted Pumps

- Large range of pump sizes and capabilities
- High head and high flow units
- Mine spec available
- Open frame and canopy units
- Perfect for moving around site to use in various locations

Pontoon Mounted Pumps

- Various configurations and sizes
- Safety rails and walkways
- Inhouse design and fabrication to suit any requirement

» POWEREQUIPMENT

Generators and power solutions available for hire, purchase or design & installation.

Power generation solutions can be suited to your requirements, whether it be a small portable generator to power your tools and equipment, through to a complete continuous power solution for your site or event.

Our team of industry experts and technicians can help tailor a solution for your specific needs to ensure you have a suitable and reliable power solution.

FEATURES

6kVa - 1,250kVa units available

Single & three phase options

240v & 415v

50hz & 60hz

Trailer or skid mounted

Overload circuit breakers

Starter boards and cables
also available.

COMPRESSOR EQUIPMENT

NPE maintains a range of high pressure and high volume compressors and associated equipment.

With compressors up to 1600cfm and operational pressures to 500psi we can assist with your compressed air needs.

Like all NPE equipment, all compressors are suited and designed for its intended purpose.

FEATURES

- Full instrumentation
- Safety shutdown system
- Noise reduction system
- Can be supplied with fully bunded fuel tanks.
- Full range of coolers, dryers & filters

OTHER EQUIPMENT

As a turnkey solutions provider, NPE has a range of ancillary equipment to ensure you can get the job done effectively & efficiently.

All of our equipment is available for hire short or long term.

Welders

Breaktanks

Lighting Plant

Fuel Cells

Loaders

Backhoes

Bobcats & Positracks

Light & Heavy Vehicles

Standpipes

Flow meters

Valves & Fittings

HDPE Pipe

Layflat hose

Filters

Remote Telemetry

Vessels

HDPE Welding Machines

» DEWATERING

NPE provides a full range of dewatering services to the civil, construction and mining industries.

Regardless of the application, our process is simple and effective. We work closely with each client to develop an in-depth understanding of the requirements in order to design and construct an effective water management solution.

- Groundwater dewatering
- Wellpoint dewatering
- Deepwell dewatering
- Open cut mine pit dewatering
- Underground mine dewatering
- Water treatment
- PH correction & turbidity control

» BYPASS PUMPING

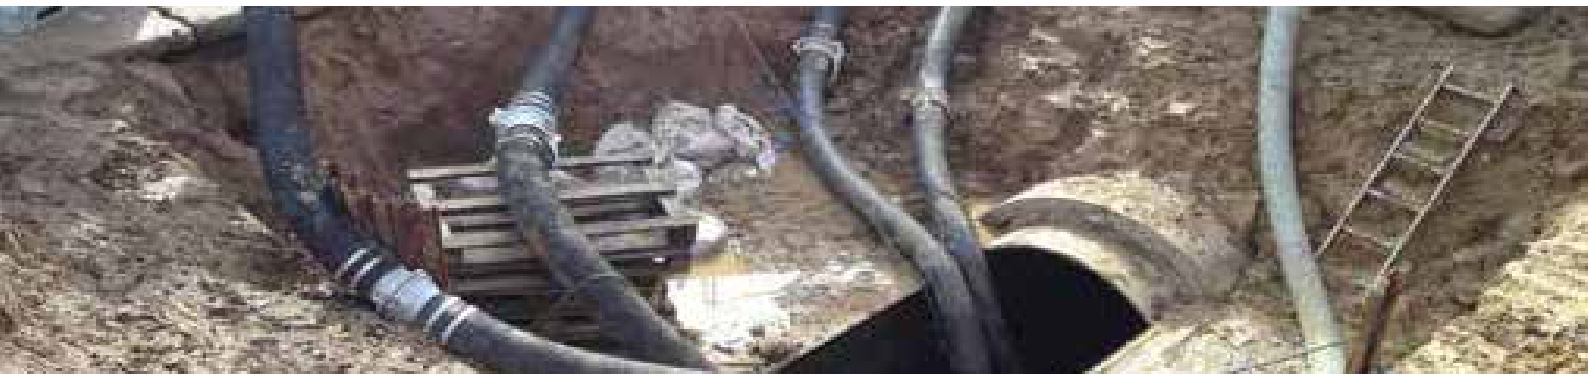

NPE understand that temporary sewer and water bypass systems require the complete reliability of equipment and the people who operate it.

That's why councils and utilities across Australia rely on NPE for planned and unplanned sewer bypass work.

At NPE, we have the best specialist pump equipment for bypass works, including silenced diesel driven units and electric submersible pumps.

Our wealth of knowledge and experience combine to ensure the bypass system performs effectively and no service interruptions are experienced during the duration of the works.

EQUIPMENT + EXPERIENCE = EFFECTIVE SOLUTIONS

ASSISTED EVAPORATION

Where restrictions on discharging water off site are a problem, assisted evaporation is a unique solution that can help.

These fully automatic water evaporation systems run by pre-programmed weather criteria, so there is no need for site personnel to operate the units.

From basic trial setups to large systems, our dedicated and experienced team will tailor a solution to your requirements.

»HYDROMINING

Hydromining offers a superior alternative to loading and hauling unwanted material.

The process involves the product being converted into slurry through application of high pressure water then pumped via a pipeline to the desired location.

Hydromining is a popular process because of its fast, safe and cost effective method of discharging unwanted materials.

THE PERFECT SOLUTION FOR

- Recovery of tailings
- Cleaning of process water ponds
- Thickener cleans
- Tank cleaning
- Sludge and slurry removal

» BOREPUMPING

National Pump & Energy (NPE) provide a complete range of bore pump hire equipment for turnkey borefield pumping, pipeline and monitoring services and capabilities.

We provide borefield services to Australia's mining, construction and agriculture industries. We have the people, products and expertise to deliver you solutions exceeding your expectations

PIPELINE CONSTRUCTION

Our HDPE (poly) pipe division specialises in the design, supply and installation of pipelines from 32mm up to 1000mm.

Our huge fleet of welding machines and associated equipment means we can do the job quickly and efficiently every time.

We also hire and sell a wide range of associated parts including: Pipe lengths, gaskets, flanges, bends, fittings and valves.

EQUIPMENT SELECTION

Choosing a pump, generator or compressor is not a straight forward decision. Many factors must be taken into consideration to achieve optimum effectiveness and efficiency. Using a dedicated pump or power expert is your best option.

An NPE equipment expert will help you choose the right equipment and ensure it will do the job you need it to do.

HAVE YOU THOUGHT ABOUT....

- How much power is required?
- How far does it need to be pumped?
- What flow rate is required?
- Will solids be pumped?
- How much fuel will it use?
- What is the total dynamic head?
- What is the water quality?
- Electric or diesel?
- Silenced or open frame?
- How will friction loss affect flow rate?
- Correct pipe size selection?

Static Head – The hydraulic pressure at a point in a fluid when the liquid is at rest.

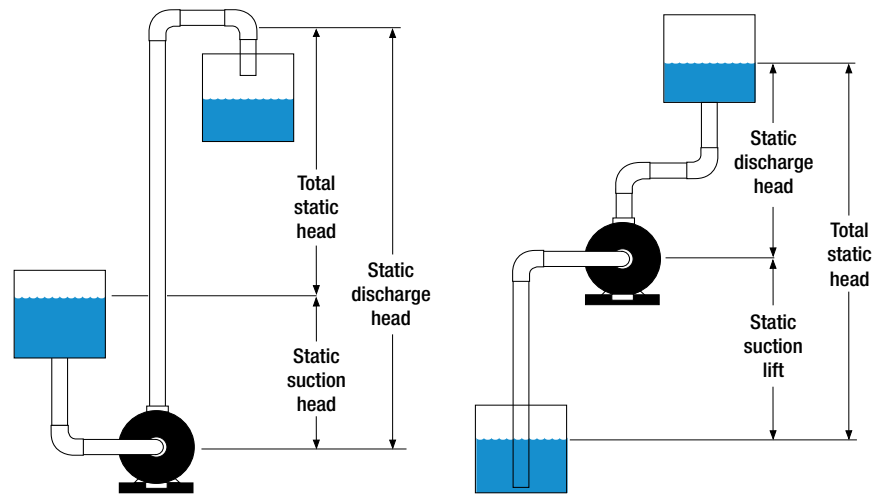

Friction Head – The loss in pressure or energy due to frictional losses in flow.

Discharge Head – The outlet pressure of a pump in operation.

Total Head – The total pressure difference between the inlet and outlet of a pump in operation.

Suction Head – The inlet pressure of a pump when above atmospheric pressure.

Suction Lift – The inlet pressure of a pump when below atmospheric pressure.

» PAST PROJECTS

» Bypass Pumping

Location: Rockhampton, Queensland
Solution: Water bypass system designed and supplied to service the Rockhampton region whilst pump station maintenance was being conducted.
Equipment: 8" Silenced pump packages, telemetry control, fuel cell, pipeline and hoses.

» Wellpoint Dewatering

Location: Brisbane, Queensland
Solution: Perimeter wellpoint dewatering system designed, supplied and installed to allow for basement excavation.
Equipment: BBA silent self priming pump packages, 100 x spear perimeter system, piping, hoses, valves and associated equipment.

» Mine Dewatering

Location: Moranbah, Queensland
Solution: Construct fit for purpose system, in yard system testing, deliver, install, commission, operate and maintain.
Equipment: Fully automated 550hp diesel pumps, pontoon, remote telemetry, pipeline, hoses, flow meters & service vessel.

» Assisted Evaporation

Location: Bowen Basin, Queensland
Solution: Supply fully automated diesel powered evaporation system.
Equipment: Fully automated evaporators, 550 and 330kva super silenced generators, 75lt/sec pumps, starters, weather monitoring station, telemetry, pipeline and hoses.

» PAST PROJECTS

» Hydromining

Location: Kalgoorlie, Western Australia
Solution: Removal of tailings slimes from secondary settling dam. Design, complete product recovery, dam cleaning & reinstatement
Equipment: Remote controlled hydromining monitor, water winning pump system, booster pump, recovery pump, slurry pump and fuel cells.

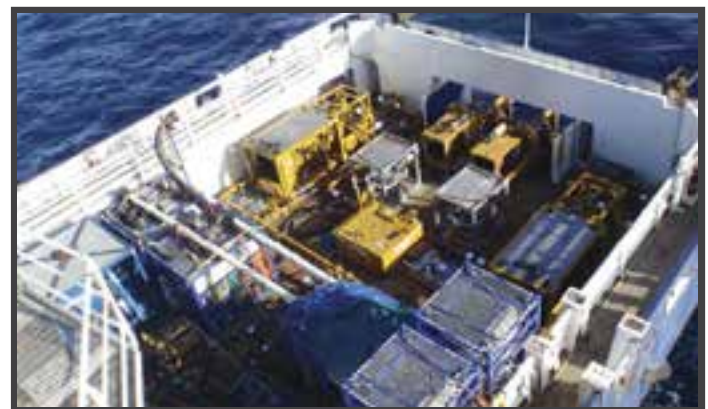

» Bore Pumping

Location: Kalgoorlie, Western Australia
Solution: Supply complete fully automated, self managed mill water supply system.
Equipment: 20lt/sec @ 12bar vertical inline pump units, 80kva super silent generators, Flow meters, Pipeline, remote telemetry, floating pump stations & bulk fuel cells.

» Power Generation

Location: Curtin Immigration Centre
Solution: To provide 2MW of power generation station for various facilities at the detention centre
Equipment: Various generator sets from 150kVA - 550kVA, bulk fuel cells, distribution boards, cabling and leads.

» Oil & Gas

Location: Offshore
Solution: Design, engineer, construct, certify and operate water winning and pigging pump package.
Equipment: Diesel driven suction lift pumps feeding 950hp diesel power units driving 4x high pressure multistage centrifugal pumps.
