AUTOMATION
CHOOSING THE RIGHT PRODUCT

Automation projects require the best quality components to ensure reliable and ongoing performance. Choosing these components can be a time-consuming and sometimes difficult job. Auto Control Systems, with decades of experience in automating a huge range of systems and applications can make that decision easy by recommending or even selecting the best fit components for both quality and purpose for your project.

Auto Control Systems has forged strong relationships with a number of world-leading electronics and automation companies to allow us to provide a complete and refined range of products to our customers. We have helped hundreds of customers select project components that best suit their requirements and where necessary, allow for future expansion of the automated system.

The choice of each component is not only made on individual merit, as each has to be selected based on its ability to perform as a cohesive whole once the whole systems has been designed and built. A poor choice in one component can affect an entire system. Something as seemingly benign as operating temperature range can be easily overlooked by inexperienced engineers and result in a product failure. Auto Control

Systems, in dealing with all levels of the selection, procurement, engineering and building of automated systems, avoids these pitfalls with multiple levels of review during the whole process. You can rest assured that the product delivered has undergone stringent testing.

ifm electronic

Australian Certified Integrator
Automation, Sensors, PLC, HMI (Human-Machine Interface), 3D Vision systems, Collision avoidance, Oil condition monitoring, Data logging, High IP rating, Built for extreme conditions

ABB

System Integrator
PLC, HMI Automation products, Jokab Safety Products, Contactors, Switchgear, Multi- level terminals, Softstarters, Emergency stops, VFDs, Lights, Servo drives and motors

AXELENT

WA Distributor & Integrator
X-Guard Machine guarding systems, X-Tray 316L stainless wire tray, Galvanized and Zinc wire tray

Schneider Electric

Integration Partner
PLC, HMI, Automation products, Contactors, Switchgear, Multi- level terminals, Softstarters, Emergency stops, VFDs

SATEC
Powerful Solutions

WA Distributor & Integration Partner
NMI Approved, DIN rail mount power metering, Multi tenant metering, eXpert Power® billing software

EIA DISTRIBUTION

Sister Company
Enclosures & boxes, Connectors & ferrules, Conduit & fittings, Lockout systems, Ducting

FLOMEC®

WA Distributor
Oval gear, insertion, turbine and impeller flow meters, electronic flow instrumentation.

Rockwell Automation

System Integrator
Allen Bradley Automation products, Contactors, Switchgear, Multi- level terminals, Softstarters, Emergency stops, VFDs, Lights

Pro-face

WA Channel Partner
HMI (Human-Machine Interface), Industrial PCs, Gateway Functionality, GP-ProEX software, Remote HMI viewer

UNIVERSAL ROBOTS

WA Distributor & Integrator
Collaborative Light weight industrial robot arms, flexible deployment, safe operation, User friendly , Rapid ROI

ROBOTIQ

Australian Distributor
2 and 3 finger Adaptive robot grippers, Force torque sensors

MICROSCAN®

WA Distributor & Integrator
Vision systems, Automated hands-free barcode scanners, Barcode verification systems

PEGASUS PROCESS SOLUTIONS

Sister Company
Instrumentation and process control, Nivelco, ATMI, Kemm Kueppers, Katronic, Knick, Klay, Balluff, Leuze, Krohne

EXIDE Batteries

WA Distributor
4WD and Light commercial, Truck, Heavy commercial and Industrial Batteries
